

# SPLTea 2015

2<sup>nd</sup> International Workshop on Software Product Line Teaching  
held in conjunction with SPLC 2015, 20 July 2015, Nashville, USA  
<http://spltea.irisa.fr/>

## 1. MOTIVATION AND GOALS

With around two decades of existence, Software Product Lines (SPL) are now well-established in research and industry. The body of knowledge collected and organized by the SPL research community is still growing.

Without any effort for disseminating this knowledge, engineers of tomorrow are unlikely to be aware of the issues faced when engineering SPLs (or configurable systems) – up to the point they will not recognize this kind of systems. In turn, they will not use appropriate techniques and face problems such as scalability that the SPL community perhaps already studied or solved.

We believe education has a key role to play. The teaching of SPLs can enable the next generation of engineers to build highly complex, adaptive, and configurable software systems. Also, research can benefit from teaching: students can be involved in controlled experiments and researchers involved in teaching can identify potential missing gaps of SPL engineering tools and techniques.

Teaching SPLs is challenging. Currently, it is unclear how SPLs are taught, what are the possible gaps and difficulties faced, what are the benefits, or what is the material available?

This workshop aims to **explore and explicate the current status and ongoing work on teaching software product lines at universities, colleges, and in practice** (e.g., by consultants) and **discuss gaps and difficulties** faced when teaching SPLs, **benefits to research and industry**, different ways to teach SPL knowledge, common threads, interests, and problems. The overall goal is to strengthen the important aspect of teaching in our community. The workshop particularly aims at bringing together researchers and practitioners to discuss their experiences in SPL teaching. This year there will be a special focus on the

design and the population of **an open repository of resources dedicated to SPL teaching**.

<http://teaching.viability.io>

We also aim to learn from other communities, i.e., we want to attract submissions that discuss teaching experiences in general and their applicability to the SPL field.

## 2. TOPICS

We are interested in all topics related to teaching in the context of SPLs. Topics include, but are not limited to:

- Experiences with teaching SPLs to students or practitioners
- Best practices for teaching SPLs
- Innovative curricula or course formats
- Impact of the online education movement (MOOCs) on teaching SPLs
- Innovative methods for teaching SPLs in online courses
- Integration of SPL research into teaching and training
- The influence of new paradigms, such as cloud computing or global software development, on SPL teaching
- Ensuring graduated students meet industry needs through the understanding of SPL techniques
- Innovative use of social media for knowledge management in SPL teaching

## 3. SUBMISSIONS

We are seeking for research papers, experience reports as well as position and vision papers (8 pages max.) in [ACM SIG Alternative Proceedings Style](#).

**New this year:** we solicit short papers (2 pages min, 4 pages max) presenting teaching resources that will be publicly committed in the open repository. Such papers will describe the resources' content, the context in which the resources have been used, and how the

resources can be reused by others. Submissions will be selected based on the relevance to the workshop topics and the suitability to trigger discussions. Accepted papers will appear in Volume 2 of the SPLC conference proceedings published by ACM. Papers should be submitted as PDF files via EasyChair:

<https://www.easychair.org/conferences/?conf=spltea2015>

## 4. IMPORTANT DATES

Submission Deadline: **May 10, 2015 (extended)**

Notification of Acceptance: June 1, 2015.

Camera-ready Deadline: June 15, 2015.

Workshop: July 20, 2015.

## 5. ORGANIZATION

### PROGRAM COMMITTEE

Andrzej Wąsowski, ITU, DK  
Christian Kaestner, SEI, USA  
Eduardo Almeida, UFBA, BR  
Jaejoon Lee, Univ. Lancaster, UK  
Jan Bosch, Chalmers, SWE  
John D. McGregor, Clemson Univ., USA  
Klaus Schmid, Univ. Hildesheim, GER  
Martin Becker, IESE, GER  
Natsuko Noda, Shibaura, JP  
Philippe Collet, Univ. Nice Sophia Antipolis, FR  
Sandro Schulze, TU Braunschweig, GER  
Sven Apel, U. Passau, GER  
Tomi Männistö, Helsinki Univ., FI  
Tomomi Kishi, Waseda Univ., JP  
Natsuko Noda, Shibaura, JP  
...and the workshop organizers

### WORKSHOP ORGANIZATION

Mathieu Acher, Univ. Rennes 1, FR  
Roberto Lopez-Herrejon, JKU Linz, AT  
Rick Rabiser, JKU Linz, AT
